

# Scalable Machine Learning and Deep Learning - Review Questions 5

**Deadline: Dec. 11, 2021**

1. **1 point.** Explain how does the data-parallelized learning work?

---

2. **1 point.** Explain how does the model-parallelized learning work?

---

3. **1 point.** Explain different synchronization approaches in data-parallelized learning?

---

4. **1 point.** Briefly explain gradient quantization and gradient sparsification.

---

5. **1 point.** Use the following picture and show step-by-step how the ring-allreduce works to compute the maximum of all elements?
